SKILLS

JavaScript	Node.js	HTML	CSS
MongoDB	Java	Python	React.js

EDUCATION

V SCHOOL CODE ACADEMY

A 12 week intensive program that prepares students for a full time web development job by training them in both front end and back end development. Students that graduate are trained to understand, manipulate, create and query databases and APIs . On the client side, students will leave versed and savvy in responsive design and dynamic interfaces.

ST. JOHN'S UNIVERSITY - **2011-2015**

Studied Biology in the Accelerated Masters Program & Finance with a minor in Social Justice

St. John's Biology is a vigorous program that benefits from an internationally known faculty and academic resources. While there, I studied Biology and Finance with a minor in Social Justice. In addition, being a member of the Ozanam Scholars Program allowed me the chance to participate in global citizenship which is aimed at humanitarian efforts to better society in such areas such as France and Italy.

FREE CODE CAMP - FRONT END CERTIFICATION

Free Code Camp is an online community based website that allows any body to gain coding knowledge for free. They offer a full stack development certification in Front End Development, Back End Development, and Data Visualization.

RECENT WEB DEVELOPMENT PROJECTS

FOODIE - THE NEXT RECIPE FINDER - Foodie is a full CRUD application that allows users to search for recipes through ingredient, category, or by hot items of the day and save these recipes to look up for later. The application uses a RESTful API through angular http requests to allow my AngularJS client to display this information in a nicely bootstrapped website.

- The website was built with HTML5, CSS3, JavaScript, Angular, and Node.js (Express).

EXPLORATION - SEEING SPACE THROUGH NASA - Exploration is a website that is built to inform it's viewers on the activity of space. Through uses from NASA's RESTful API, viewers can: learn from a daily article that is displayed with a picture, view our near-earth objects and it's details, see a satellite image of their location (using their IP address), and see pictures from the rover - Curiosity - on Mars.

- The website was built using AngularJS, HTML5, CSS3, and Bootstrap.
